

IEEE Topical Conference on RF/Microwave Power Amplifiers for Radio and Wireless Applications

18–21 January 2026 – Loews Hollywood Hotel – Los Angeles, CA, USA

IEEE

MTT-S
IEEE MICROWAVE THEORY &
TECHNOLOGY SOCIETY

Part of
Radio and Wireless Week 

Steering Committee

General Chair

Václav Valenta,
European Space Agency

General Co-Chair

Roberto Gomez-Garcia,
University of Alcalá

Technical Program Chair

Markus Gardill,
*Brandenburg University
of Technology*

Finance Chair

Kenneth E. Kolodziej,
MIT Lincoln Laboratory

PAWR Co-Chairs

Gregor Lasser,
Chalmers University
Anna Piacibello,
Politecnico di Torino

WiSNet Co-Chairs

Paolo Mezzanotte,
University of Perugia
Fabian Lurz,
Magdeburg University

SiRF General Chair

Ickhyun Song,
Hanyang University

SHaRC Co-Chairs

Jan Budroweit,
German Aerospace Center
Eduardo Rojas,
*Embry-Riddle
Aeronautical University*

Executive Committee Chair

Robert Caverly,
Villanova University

Conference Management

Elsie Vega, *IEEE*

Call For Papers

The 2026 IEEE Topical Conference on RF/Microwave Power Amplifiers for Radio and Wireless Applications (PAWR 2026) will be a part of 2026 IEEE Radio and Wireless Week (RWW 2026) which will be held during the week of 18–21 January 2026 at the Loews Hollywood Hotel – Los Angeles, CA, USA. RWW 2026 will also feature:

- IEEE Radio and Wireless Symposium (RWS)
- IEEE Topical Meeting on Silicon Monolithic Integrated Circuits in RF Systems (SiRF)
- IEEE Topical Conference on Wireless Sensors and Sensor Networks (WiSNet)
- IEEE Space Hardware and Radio Conference (SHaRC)
- Workshops, Special Sessions, Short Courses

Each of these events will be organized separately, with their own call for papers found at www.radiowirelessweek.org.

Power amplifiers for radio and wireless applications (PAWR) are often the most critical component of RF/microwave communications systems and consequently the focus of intense research to achieve increased linearity and power efficiency. New forms of power amplification are being developed to meet the needs for wireless communication, instrumentation, and sensing satisfying the world's demand for sustainable interconnectivity. PAWR 2026 will feature tracks on RF/microwave Power Amplifiers. Papers featuring innovative work are solicited in (but not limited to) the following areas of RF/microwave power amplifier technology:

- High Power/Wideband Active Devices
- Power Amplifiers for Mobile, Avionics and Space
- Modeling and Characterization
- Advanced Circuit Design and Topologies
- Green Power Amplifier Technology
- Integration Technology
- Packaging and Reliability
- Linearization and Efficiency Enhancement Techniques
- Applications, Novel Architectures and System Analysis

Paper submission instructions can be found at www.radiowirelessweek.org. Submissions should be formatted according to the submission review template available on the RWW website. Authors should indicate preference for oral or poster presentation. All submissions must be received by **23 July 2025**. All accepted papers will be published in a digest and presented papers will be included in the IEEE Xplore® Digital Library. Submissions will be evaluated based on novelty, significance of the work, technical content, interest to the audience, and quality of writing.
